

U.S. Serial No. 09/766,525
Response to the Office Action Dated January 13, 2005

In the Specification:

Please replace the third full paragraph on page 15 with the following paragraph, which does not introduce any new matter:

The file manager may manage the recorded content by maintaining a database, containing an entry for each recorded item. The entry may describe the content recorded and identify the memory device (either removable or not) which contains the recorded content. The entry may include all or part of the information received from the electronic program guide. The information received from the electronic program guide may be automatically entered. The entry may also be supplemented by notes or images from the user. The entry may also contain alphanumeric characters, images or both. The file manager may also forward the entry information to the printer 300 290, either directly from the storage device 200 or via the apparatus 100 (for example, the control unit 70) so that the entry information is printed on a label that can be affixed to the memory device. The file manager may also prompt the user, via user interface 90, to place a self-stick adhesive label in the printer 300 290.
